

# THUNDER LAKE GOLD DEPOSIT: 2010 MINERAL RESOURCES AND POTENTIAL

Main Zone, north-facing longitudinal section (grade x thickness contours)

- 5 high-grade structures identified to date (labelled West to East)
- additional high-grade structures developing between existing structures and within west/east extensions
- dark/light blue areas show potential but require additional drilling
- **depth potential:** drill-tested to +800 metres vertical and open at depth
- **west strike potential:** additional 800 metres beyond current resources
- **northeast strike potential:** additional +3,000 metres beyond current resources
